Expected 2028

- Founding the university's computer science association (in progress)

Certificates

Network+ · Faradars
2025

Languages

Persian
Native

English
Advanced (professional working proficiency)

About

Computer engineering student and web developer based in Kermanshah, Iran. I build and deploy web systems with Django, write small tools that solve real problems, and handle the visual design of my work myself. On the path to full-stack, and learning every day.

Experience

Full-stack developer (freelance) · A pharmaceutical company — Aug 2026 – Oct 2026

Request management and workflow system

- Designed and built a request management and workflow system end to end, from scratch to deployment, with Django, DRF and PostgreSQL across 15 apps.
- Built a workflow engine with conditional paths, parallel approvals, voting, referrals and automatic assignment, plus a drag-and-drop form builder (15+ field types) and a live-diagram workflow designer.
- Multi-company setup with full data isolation, Active Directory sign-in, role-based access, deadlines based on working hours and Persian holidays, and in-app, email, Web Push and SMS notifications.
- 359 automated backend tests and 34 Playwright browser scenarios; deployed with Docker Compose and nginx, with tested nightly backups and a full maintenance guide.

Founder (freelance) · GeekProject — Fall 2026 – Present

Project services for students and small businesses

- Website design, graphic design and Word, Excel and PowerPoint documents for students and small businesses, run through the GeekProject Telegram channel.

Projects

GeekRTL — JavaScript · Chrome MV3

Chrome extension that displays Persian and Arabic text correctly right-to-left on AI chats such as Claude, ChatGPT and Gemini. mani-imani.github.io/GeekRTL

GeekRef — HTML · CSS · JavaScript · PWA

Persian-language cheatsheet site for developers. mani-imani.github.io/GeekRef

GeekOrbit — JavaScript · SQLite (sql.js)

Local, offline dashboard that shows which project and chat lives on which of several AI chatbot accounts. mani-imani.github.io/GeekOrbit

GeekType — Python · Linux · Wayland

Linux tool that fixes text typed in the wrong keyboard layout (e.g. “sghl” for «سلام») with one key, F9, in any app. mani-imani.github.io/GeekType

Telegram bots — Python · Telegram API

Telegram bots in Python for organizing groups and posting automatic comments.
